

Adaptive Mesh Refinement for Turbulent Fluid Simulation

Alice Chen, David Kim, Maria Lopez

Motivation and Prior Work

? Motivation and Prior Work ? key point 1 of talk 1, with distinct wording so deduplication never merges pages.

? Motivation and Prior Work ? key point 2 of talk 1, with distinct wording so deduplication never merges pages.

? Motivation and Prior Work ? key point 3 of talk 1, with distinct wording so deduplication never merges pages.

? Motivation and Prior Work ? key point 4 of talk 1, with distinct wording so deduplication never merges pages.

Problem Formulation

? Problem Formulation ? key point 1 of talk 1, with distinct wording so deduplication never merges pages.

? Problem Formulation ? key point 2 of talk 1, with distinct wording so deduplication never merges pages.

? Problem Formulation ? key point 3 of talk 1, with distinct wording so deduplication never merges pages.

? Problem Formulation ? key point 4 of talk 1, with distinct wording so deduplication never merges pages.

Neural Program Synthesis in Modern Compiler Pipelines

Wei Zhang, Robert Martinez, Sofia Rossi

Harness Research Symposium 2026

Benchmark Results

? Benchmark Results ? key point 1 of talk 2, with distinct wording so deduplication never merges pages.

? Benchmark Results ? key point 2 of talk 2, with distinct wording so deduplication never merges pages.

? Benchmark Results ? key point 3 of talk 2, with distinct wording so deduplication never merges pages.

? Benchmark Results ? key point 4 of talk 2, with distinct wording so deduplication never merges pages.

Limitations and Future Work

? Limitations and Future Work ? key point 1 of talk 2, with distinct wording so deduplication never merges pages.

? Limitations and Future Work ? key point 2 of talk 2, with distinct wording so deduplication never merges pages.

? Limitations and Future Work ? key point 3 of talk 2, with distinct wording so deduplication never merges pages.

? Limitations and Future Work ? key point 4 of talk 2, with distinct wording so deduplication never merges pages.

Fault-Tolerant Quantum Error Correction Codes

Carol Tanaka, James Wright

Harness Research Symposium 2026

Motivation and Prior Work

? Motivation and Prior Work ? key point 1 of talk 3, with distinct wording so deduplication never merges pages.

? Motivation and Prior Work ? key point 2 of talk 3, with distinct wording so deduplication never merges pages.

? Motivation and Prior Work ? key point 3 of talk 3, with distinct wording so deduplication never merges pages.

? Motivation and Prior Work ? key point 4 of talk 3, with distinct wording so deduplication never merges pages.

Problem Formulation

? Problem Formulation ? key point 1 of talk 3, with distinct wording so deduplication never merges pages.

? Problem Formulation ? key point 2 of talk 3, with distinct wording so deduplication never merges pages.

? Problem Formulation ? key point 3 of talk 3, with distinct wording so deduplication never merges pages.

? Problem Formulation ? key point 4 of talk 3, with distinct wording so deduplication never merges pages.
